

**Advanced Electronic Upgrades
Virtue Paintball 2006**

upgrade the Engine™

Virtue is a whole new way of looking at paintball upgrades.

Up until now, what parts did players replace to improve their marker's performance? The barrel, the bolt, maybe the trigger. The same old upgrades, using the same old technology.

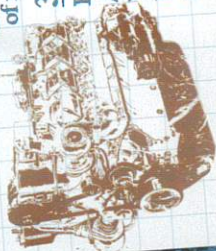

All these upgrades have one thing in common. They are external upgrades that try to squeeze a little bit more performance out of your marker...if you're lucky.

These days most guns come with good barrels, decent triggers and efficient bolts. None of them upgrade the heart of your marker. **THE ENGINE.**

That's where Virtue comes in. Virtue upgrades your gun's engine with the most advanced software in paintball. Our programmers have taken your marker and optimized and reengineered its circuit boards to perform better at every level.

Upgrading the engine is the only way to dramatically improve performance. Whether you're looking for faster rates of fire, more fire modes & features or improved reliability, Virtue is all you need.

And unlike replacing your car's engine (no small task), replacing your marker's engine is something you can do yourself, in a matter of minutes.

30 Day Money Back Guarantee
Best of all, you don't have to take our word for it. All Virtue Chips and Boards ordered through VirtuePaintball.com are backed by a 30 day money back guarantee. So what are you waiting for? Get some Virtue in your gun!

VirtuePaintball.com

FEATURES:

- *easier to shoot fast
- *never chop paint
- *fully adjustable
- *improved eye logic
- *enhanced trigger logic
- *full auto, rarping
- *breakout mode
- *100% tourney legal
- *more consistent streams of paint

see Virtue in action
@ VirtuePaintball.com

Virtue Logic™

Virtue Logic makes perfect sense. The stock programming in your marker already does a decent job, but Virtue Logic improves everything, giving you an edge. We've enhanced the standard eye logic to work better with all types of paint, ensuring you have the fastest responding gun that never chops a ball.

Virtue also improves the programming behind the trigger. Virtue Logic scans the trigger thousands of times every second, making sure each pull is registered so you can shoot faster than ever, even in true semi auto mode.

Virtue's Seven Unlimited Modes

Seven base modes of fire, with virtually unlimited combinations of settings. With Virtue, you get the best software with the best fully adjustable modes.

No limitations. Take our ramping mode for instance. Virtue doesn't just give you 1 or 2 options for ramping. With Virtue you get virtually an infinite amount of firing settings. PSP Ramping capped at 15bps. Virtue has it.

You control when the the ramping starts, how much it ramps by as well as the maximum rate of fire. Set Virtue to increase your rate of fire by 50% when you pull the trigger 5 times per second. Or maybe increase your rate of fire 100% or 200% when you're pulling the trigger 12 times per second. Virtue gives you complete control over your gun.

Then you can make things more interesting with Breakout Mode. On the breakout, when you pull the trigger for the first time, your marker shoots full auto, making running and gunning a snap. After your full auto burst, it goes into Ramp Mode and ramps based on your settings.

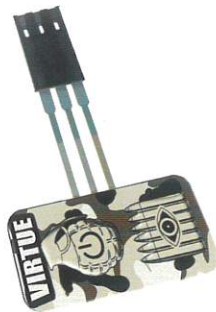

That's just a couple of Virtue's seven base modes. Virtue also comes with NX1 Mode, Auto Response, PSP Mode, and the world's fastest Semi Auto Mode thanks to Virtue's improved eye and trigger logic.

With Virtue, the combination of firing modes is limitless.

VIRTUE

2K4/5/6 INTIMIDATOR BOARD

Works with any Intimidator using an Alias or 2005/6 frame
part no. VPINTVB

- * 100% tournament legal
- * Virtually Infinite firing capabilities
- * 7 color LED with instant-on
- * PSP ramping, NXL mode, full auto, breakout mode
- * Adjustable ramp percentage and activation speed
- * Adjustable debounce, eye sensitivity, AMB & ABS

"Virtue takes the Intimidator to the next level in performance and reliability. Your Intimidator will be faster and shoot smoother, more consistent ropes of paint than ever before."

Semi Auto

100% NIPPL Legal.
The fastest legal semi auto mode in paintball. Virtue's advanced eye and trigger logic will make your gun shoot faster, more consistent ropes of paint than ever before.

PSP Ramping

100% PSP legal when set @ 15bps. First 3 shots are semi. After 3 shots, ramps to your Max rate of Fire setting. Let go of the trigger for 1 second and the 3 shot semi-auto count restarts.

NXL Full Auto

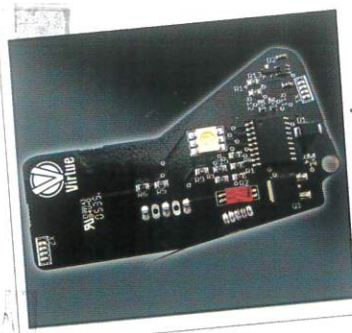

100% NXL legal when set @ 15bps. First 3 shots are semi. After 3 shots, hold the trigger down for full auto. Let go of the trigger for 1 second and the 3 shot semi auto count restarts.

Full Auto

Hold down the trigger and your marker fires full auto to the max rate of fire your loader can feed. Virtue's advanced eye and trigger logic, makes this the fastest mode in paintball!

Breakout Mode

Turn the gun on, first shot shoots full auto as long as the trigger is held. Release the trigger and the gun goes into Ramp Mode. Power the gun off then on again to repeat the breakout cycle.

Intimidator

Virtue advantages in
Adjustable ramp %
Virtue eye & trigger logic
Easy programming menu
Lifetime warranty

Auto Response

This setting will make you shoot twice as fast as you can pull the trigger. Your marker will shoot 1 shot when you pull the trigger and 1 shot when you release the trigger.

Ramp Mode

The only fully adjustable ramp mode giving you total control of how your gun fires. Make your marker shoot insanely fast, or just ramp a little for a slight performance boost.

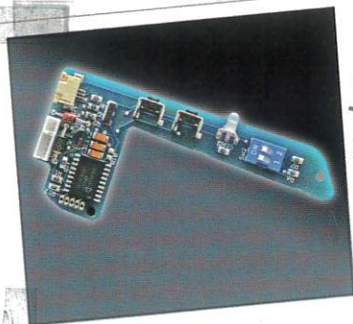

Compatible with the 2005 Proto Matrix

VIRTUE PROTO MATRIX BOARD

For the 2005 and 2006 Proto Matrix

Virtue Mesh Hats (Navy & Urban Camo)

VPMHAT-N, VPMHAT-U | Navy & Urban: one size fits all
Virtue hats are not only comfortable, but the mesh backing keeps your dome cool. Thanks to stylin' Virtue Hats, you will finally be able to attract hotties like the chick on the right. At least that's what our marketing guys tell us. If not, well, you've always got this cool hat to keep you company.

Virtue Visor Beanie

VPVISRB-C | Charcoal: one size fits all
This beanie is an equal opportunity beanie. Although a hot girl is pictured here, we promise that you too, will look hot and sexy when wearing it. But we went with the photo of this chick instead. I mean, look at you...

Every game counts and I would not think of walking on to the field without knowing my marker has "Virtue Inside". Virtue software ensures my teammates and I can perform in today's warp speed game. When I need to burn, control a lane, or establish dominance over my opponent, I know the firepower I need is, literally, right at my fingertips.

-Christopher Clark, Captain, Team Tremor
