Arrow Precision

Arrow Precision

Arrow Precision Limited has been manufacturing high quality paintballing equipment in the military town of Aldershot in the United Kingdom since 1996.

From CO₂ valves and accessories through to tournament paintball guns, we have established ourselves as the largest paintball equipment manufacturer in Europe.

With customers worldwide, we have a reputation for producing products of the highest quality and durability.

In 2005 Arrow Precision opened its subsidiary Arrow Precision LLC in Pennsylvania and can now offer US customers the same fine level of service as its European customers.

With quality products like the classic Sterling pump gun, the Inferno semi-automatic Field gun and Sterling paintballs, Arrow Precision is definitely the place for your quality paintball needs.

2 year Manufactures Warranty

All Inferno markers now come with an extended 2 year warranty. The warranty covers all markers purchased from 1st January 2008 onwards.

The warranty is subject to necessary maintenance of marker's as printed in the Inferno manual guide supplied with your marker.

Arrow LLC in the US

Arrow Precision, LLC is led by Mark Ambrose, Director of Sales and Marketing. Mark has an extensive background in the sporting goods business with over 15 years of worldwide experience in the outdoors and paintball specific markets combined.

Mark found his way into the paintball arena as International Sales and Marketing Manager at RpScherer. Mark gained an immense amount of knowledge of every facet of the manufacturing process involved in producing top quality paintballs, as well as in-depth knowledge of the marketing, sales, distribution packaging, and promotional event areas of the business.

This brings us to Mark's current foray into paintball as Director of Sales and Marketing for Arrow Precision, LLC. Founded in mid 2005, Arrow Precision has experienced an excellent rate of growth over the past 2 years that can be attributed to the operations attention to quality, detail and reliability - consistency has been the key. Utilising Arrow-Precision's high quality/trade innovative products, Mark's aim is to become a major supplier in the paintball market. Making hard work, dedication to customer service a corner stone of our shared aim in the US.

Arrow Precision, LLC is located in the heart of the east coast, with it's head office in Allentown, Pennsylvania. The region plays host to some of the top paintball facilities in the country. With additional distribution points are already in place. or planned for future expansion thought the U.S.

Sterling Pro

Developed exclusively for tournament use. Features tournament specification shell with thick hard-to-wipe fill. Formulated to break on target and not in your gun. 2000 rounds - boxed in 4 bags of 500 paintballs. Available in a wide range of colors. Also Available in retail packaging.

Sterling Game

Premium grade paintballs with a vivid marking fill. Packaged in 4 bags of 500 balls for ease of distribution. With a beautifully round shell and a striking pearlized finish GAME is the prime choice for field paintball and recreational players alike. Available in a variety of vibrant colors. Also Available in retail packaging.

**STERLING
PAINTBALLS**

Sterling Rec

The choice for the quality conscious field operator. Basic premium grade paintballs with tough clear shell specifically for field use. Packed in four bags of 500 paintballs for ease of distribution. Available in green, orange, pink and yellow. Also available in retail packaging.

Sterling Shield

Sterling's budget conscious paintball line is perfect for high volume team practice, tournament drills and entry level field use. Shield is the perfect paintball to choose when lower cost and consistent reliability are in need. Colors will vary, availability is limited. Available in retail packaging.

Starter Pack

Inferno Mk2

Inferno field marker with fore-grip, aluminum double trigger grip frame and integrated feed neck.

Cylinder

Full size 20oz cylinder with on/off valve for easy utilization.

Tournament Goggles

Competition grade mask for comfort and increased ventilation.

200 Shot Hopper

Tough construction for all you can throw at it, with spring-loaded lid for fast filling on the go.

Barrel Plug

For optimum safety.

Squeegee

Clear those breaks quickly with the dual cleaning squeegee.

Reasons for Field operators to own an Inferno..

- Lowest gas consumption of any site gun
- Longest lasting parts, due to high quality materials
- Anodized for longer lasting finish
- The most reliable site gun available
- Lowest cost of ownership of any site gun in the business

INFERN
Quality that speaks for itself

Lighter new bolt for gas efficiency.

Restyled lower profile body with sight rail removed to lessen dirt traps.

NEW FIELD MARKER

Rear of body slotted to allow bolt removal without totally removing the cocking pin. Making cleaning easier and bolt misalignment impossible.

Double trigger shoe for comfort and lighter trigger pull.

45 grip

Short barrel available for indoor field use.

Mk 3 is also available with the traditional grip as well.

Available in Black, Silver, Red and Blue.

Inferno Field Mk 3

Based on the original Inferno Field, the Mark 3 has been upgraded to give even greater comfort, visual impact and utility, making it the ultimate field marker.

Adding a 45 grip and double trigger to the Mk 3 has transformed the trigger pull and feel to one of the most comfortable ever.

Shortening the body, sculpting the top of it as well as the feed neck has produced the sleekest looking and easy to clean field Inferno yet.

The redesigned body and cocking pin allows for field stripping without removing the cocking pin from the bolt - an enormous help when cleaning the barrel, breach and body in one swift action.

A new lighter cocking bolt helps reduce the weight of the internals, further increasing gas efficiency and making this one of the lowest cost field markers to run.

Available in Black, Silver, Red and Blue.

Inferno Field MK 2

INFERN 
Quality that speaks for itself

Inferno Field Mk II

Based on the original Inferno Field, the Mark II has been adapted and upgraded to give even greater usability and visual impact, making it the most popular version of the Inferno amongst field operators ever.

The barrel has been sculpted, we've added a comfortable foregrip, increased the clearance above the hand at the back of the grip and added an integrated feed neck.

Available in Black, Silver, Red and Blue.

Inferno Field

Designed and built by Arrow Precision, the Inferno has been made to last. The most popular field gun in Europe. Built with quality and performance in mind, it is made from carefully selected, corrosion resistant materials and is anodized for durability. It comes bottom-lined as standard, with a 10 inch barrel, with other barrels available from all leading manufacturers. The Inferno is incredibly easy to clean and maintain. No tools are required to field strip and clean through in less than 30 seconds. This is one tough gun, specifically designed and built for the field operator.

Introduced in 1997, with tens of thousands of units in service around the world, in all weather conditions, the Inferno is the most reliable, lowest maintenance site paintball gun available. When your income depends on reliability and cost of ownership, the Inferno is the only choice.

Available in Black, Silver, Red and Blue.

Available right feed by special order

Complete with 10" barrel

Field strip and clean in under 30 seconds

Feed stub can be upgraded on your existing Inferno Field guns to Mk II style integrated feed neck!

Hard-wearing Black, Silver, Red or Blue finish

Inferno T3

Inferno T3

Built to last, this is one tough piece of work. The ultimate Inferno model. Comes with everything you could want from a top class marker.

Features milled, 3D contour styling with solid anodized hardwearing finish. Precision honed Hellfire barrel is ported for incredible performance. The Enhanced Volume Chamber increases gas efficiency and low pressure performance. Equipped with an aluminum double trigger frame, giving a very comfortable fast trigger action. Contoured aluminum front grip increases comfort and accuracy during rapid firing.

Available in Black, Grey, Silver, Red, Green, Blue and Purple.

Inferno Rec

Hand built to a very high standard to ensure strength and durability.

The Inferno Recreational features a center feed (with hopper adaptor included) and an extensively styled, 3D contoured, milled body. Complete with 10" barrel, available bottom lined or with a front bottle mount.

Comes in Black, Grey or Silver, or striking Red, Purple, Blue and Green solid anodized finish.

INFERN 
Quality that speaks for itself

Inferno Heat / Accessories

Inferno Heat

Understated styling with 'Heat' featured engraving. The Heat has a center feed (elbow included), front bottle mount and comes complete with 10" barrel. aluminum double trigger grip frame features comfortable, diamond texture, plastic grip plates. Polished, anodized aluminum double trigger shoe, contoured for extreme comfort. Available in the full range of Inferno colors.

15: Standard Male Quick Disconnect Fill Nipple

16: 1/8" Female Quick Release
Made from stainless steel.

17: Filtered Fill Nipple
Quick release nipple and backcheck valve.

18: 90° Elbow

Valve and Tank Safety

DO NOT tamper with or attempt to fit or replace valves unless you are qualified to do so.

Valves MUST be fitted to cylinders using a torque wrench set to 34-35 ft lbs. / 46-47 N.m. Thread-lock must be used when fitting valves to cylinders.

Use only DOT or HSE or EC certified cylinders/regulators/valves/goggles or any liability insurance that you may have is likely to be invalidated. Tanks **MUST** be retested at the period specified by the manufacturer by a certified testing facility or your insurance may be invalidated. Please observe all safety precautions given to you by your CO₂ supplier.

DO NOT overfill tanks/cylinders.

Burst Discs must only be replaced by qualified persons and fitted with a torque wrench set to 75 in/lbs / 8.5 N.m. Use genuine Arrow Precision burst discs only as other manufacturers burst discs may not be compatible with Arrow Precision valves.

Gun Safety

DO NOT run guns over 300fps. Leave enough margin when setting gun velocity to allow for fluctuations in velocity due to, among other reasons, ball size and temperature fluctuations - suggested range: 260-280 fps depending on field size and/or age of participants.

Goggle Safety

Use only goggle systems which are specifically manufactured for paintball use. Follow lens manufacturers guidelines for lens care.

Failure to use appropriate protective gear for the eyes, face and head can result in death or serious permanent injury (including injuries to the throat and/or loss of eyesight and/or hearing).

Paint Storage

To maintain optimum performance, paintballs must be stored at 59 - 86 degrees Fahrenheit (15 - 30 degrees Centigrade), with ideal relative humidity level no higher than 50%.

Storing paintballs improperly (such as in an unheated garage or van) is likely to cause paintballs to become cold which will result in them becoming dimpled, mis-shapen and fragile, rendering them permanently unshootable.

Paint Safety

Do not allow paintballs to freeze, improper storage of paintballs will compromise performance and increase likelihood of injury.

Do not shoot at the head of another person.

Do not shoot at animals.

Do not eat paintballs.

Do not shoot paintballs at someone at a distance of less than 20 feet.

These paintballs are made from non-toxic, natural ingredients and are fully biodegradable, non-irritating and non-harmful to the skin. Use soap and water to wash paint from skin.

Avoid contact with the eyes. Do not rub eyes if contact occurs. Rinse well with water or saline solution and seek medical attention.
