WELCOME TO THE FUTURE

SMART  PARTS™

ROWDY MACDONALD | PROFESSIONAL: 7 YEARS

**THE FUTURE OF
PAINTBALL WILL BE:
SMALLER, FASTER,
LIGHTER. AND
BROUGHT TO YOU
BY SMART PARTS.**

while companies were busy copying our technology and stealing our innovations, we were setting new standards. the revolution began three years ago with the impulse. the following year we introduced the freak. last year we went "custom" with private label impulses and sublimated apparel for teams and dealers. but this year we got serious. the shocker has been completely redesigned—wait until you see it. the max-flo also received a major overhaul. or should we say reduction? we created a seriously efficient LPR [someone had to]. then we invented the nerve: a culmination of 15 years of design, engineering and competition. the nerve will be the most complete gun system ever offered. the revolution continues...

MADE IN THE USA ▶ Every product we sell is made in America—not Asia or Mexico where so many paintball companies have chosen to go.

**WE PLAY PAINTBALL.
WE LISTEN TO PEOPLE WHO
PLAY PAINTBALL. AND WE
MAKE OUR OWN PAINTBALL
EQUIPMENT. WE BELIEVE
EQUIPMENT COUNTS.**

we don't make junk. it's against our corporate policy. you would think it was against everyone's corporate policy, but it isn't. fact is, we just might be the only paintball company manufacturing all its products here in america: where we can select the best materials, hire the best labor, monitor quality control, field test our products and make improvements prior to production.

what's in it for you? a better product. one that's more durable, lasts longer and functions properly with less maintenance. ever go to a paintball tournament? ever notice how many technicians other companies bring to service their equipment? ever notice how few we bring? it's a testament to the quality and reliability of our products. american made products.

MADE IN USA

NERVE

EXPOSED NERVE → Patented electronic firing (it's fast). Patented air flow (it's consistent). Patented barrel design (it's accurate). Patented attitude (it's bad-ass).

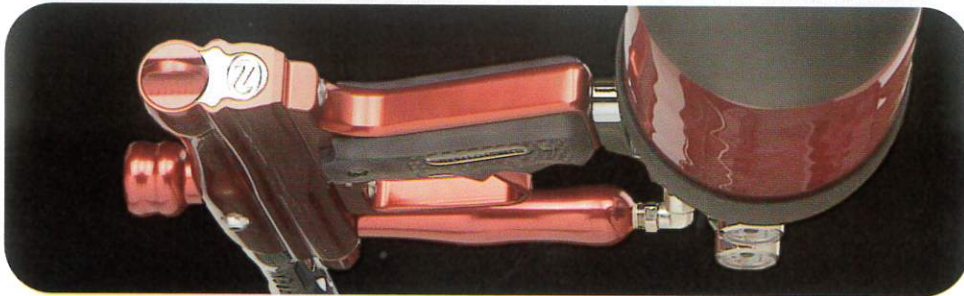

▶▶▶AND YOU THOUGHT ONLY FERRARI SOLD SEX.

GET YOUR FREAK ON the nerve comes standard with the freak barrel.

HOMELESS the solenoid housing is gone—everything is in the grip frame.

NERVE

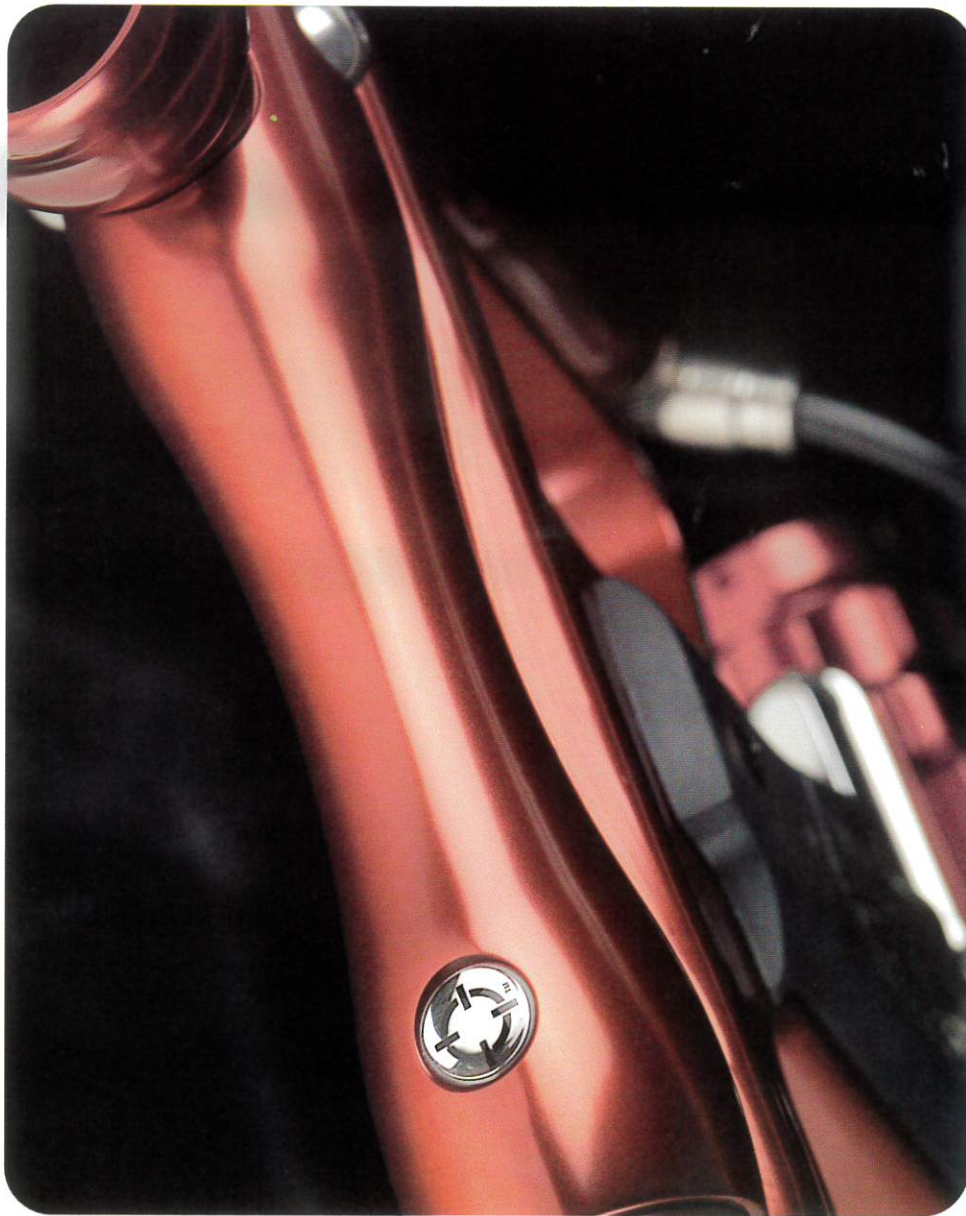

WELCOME TO THE REVOLUTION

03

AIR TIGHT the nerve receives two new innovations: the redesigned max-flo 4500 air system and the new LPR [low pressure regulator]. **MAX-FLO** it's smaller, way smaller, about half its original size, it's now an in-line reg, too—the manifold is gone, we've also integrated a dovetail mount, and the gauges can be set to either side. **LPR** self-adjusting output pressure—similar to our patented max-flo—is a feature no other LPR offers, this isn't a volumizer, it's a regulator, designed to maximize rapid firing consistency, pretty sweet.

FULLY LOADED we've built everything we ever invented into this gun. **1** patented electronic control delivers fire rate of 20+ bps. **2** patented freak barrel for unmatched accuracy. **3** patented low pressure air regulation shoots paint straight and far. **4** vision eye doesn't chop paint. **5** built-in LPR. **6** reverse polarity magnetic trigger. **7** electronics housed in grip frame to reduce body size. **8** quick clean "pin-less" bolt assembly. **9** 6-disc cd changer. [no]

SEX APPEAL ▶ maybe we were inspired by the smart girls? or was it just the growing abundance of poorly designed guns out there?

WHAT PIN? ▶ turn the knob and out pops the bolt.

HIGH ROLLER ▶ the freak barrel, max-flo 4500, vision eye and LPR are all standard features.

800.992.2147 | smartparts.com | 07

SPRING

SHOCKER

GO INTO SHOCK > Years after inventing the Shocker, no electronic marker has proven to be more accurate or reliable. Surprised? Not if you own one.

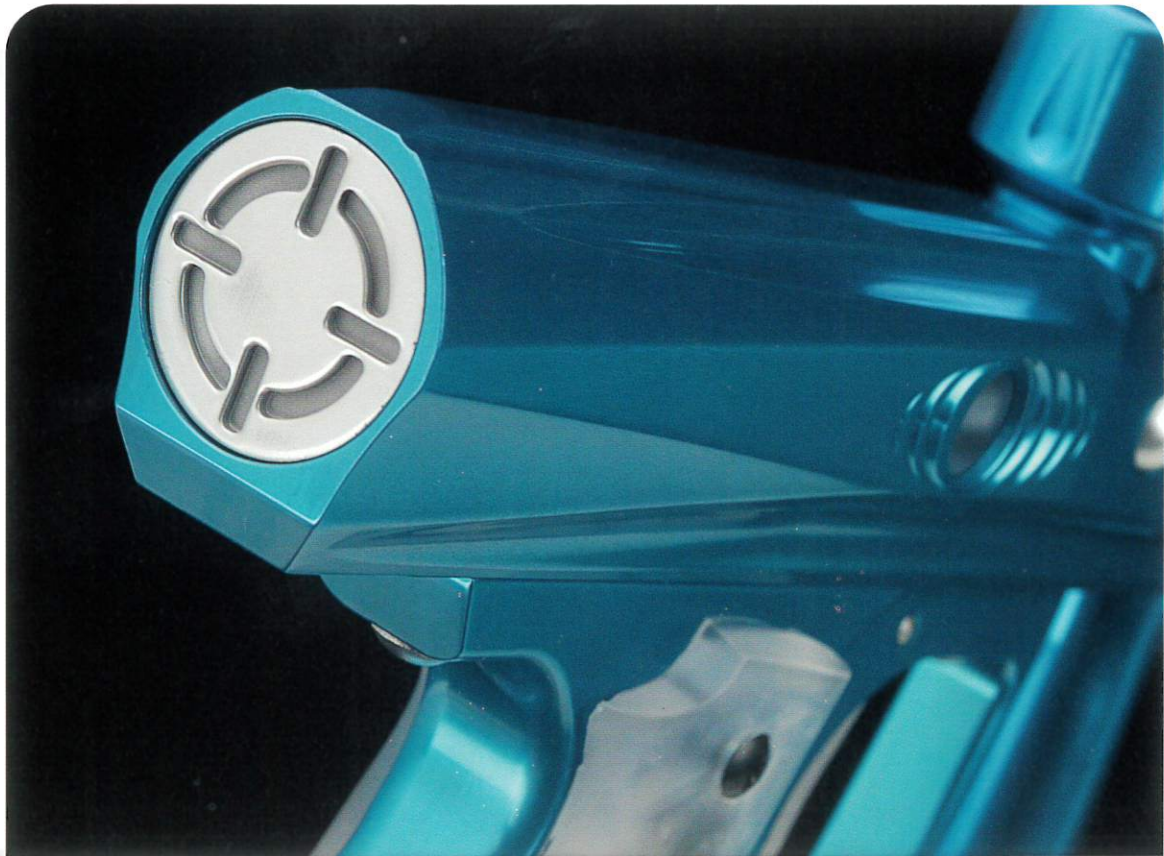

**ACCURACY MEETS INNOVATION AT THE
CORNER OF STYLE AND TECHNOLOGY.**

SHOCKER the most accurate electronic gun ever made has been reinvented, redesigned, reengineered and re-worshipped.

NEXT SHOCKER

OLD SHOCKER	NEW SHOCKER
dual solenoid timing	single [self-timing] solenoid produces more shots/second
two bore construction	single bore construction greatly reduces body size
separate solenoid housing	electronics moved into grip frame to reduce body size
standard trigger	reverse-polarity magnetic trigger
n/a	optional vision board
180 psi range	150 psi range improves air efficiency & reduces breakage
1-piece progressive barrel	2-piece all-american barrel

SPRINGG003

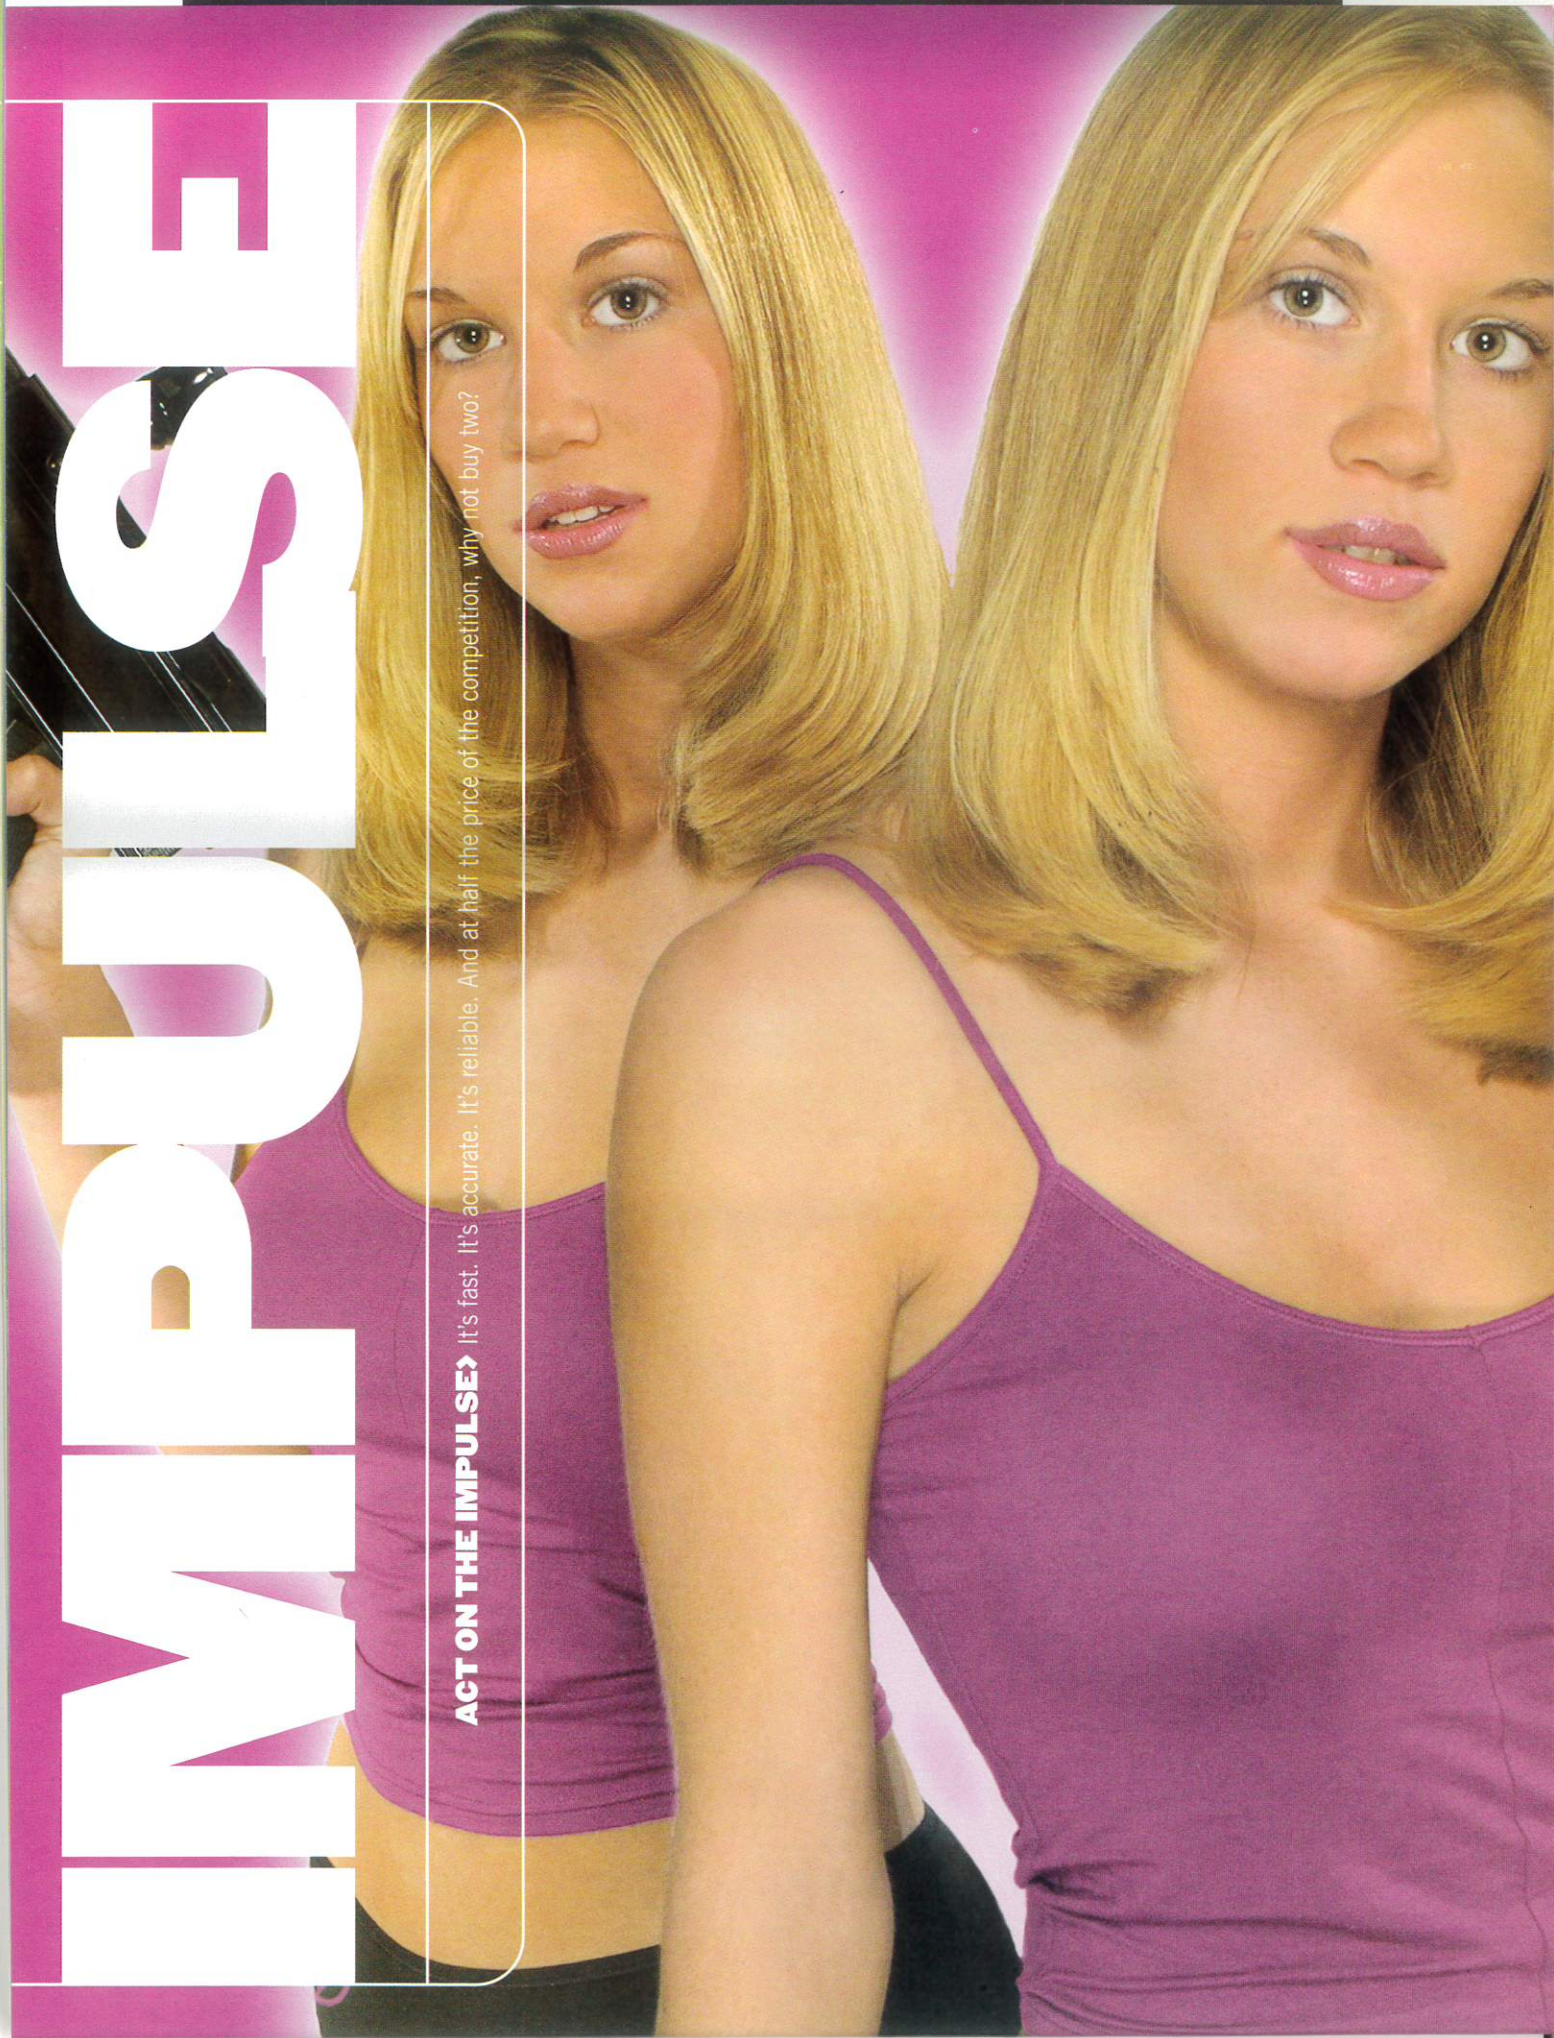

REBIRTH OF A LEGEND > ACCURACY: hey, it's the best in the world don't mess with it. TECHNOLOGY: we've put more thinking into the grip frame than most companies put into an entire gun. STYLE: it isn't something anyone has ever said about the shocker—until now. INNOVATION: you can take a block of metal, carve a bunch of crap out of it and call it the next big thing, but it's not innovation. it's merely a trend. we don't follow trends. we set them.

NOT YOUR DADDY'S SHOCKER > as you can see, the only feature we kept was the accuracy.

IMPULSE

ACT ON THE IMPULSE ▶ It's fast. It's accurate. It's reliable. And at half the price of the competition, why not buy two?

TOURNAMENT READY > pro teams, amateur teams and novice teams all choose the impulse. you should, too.

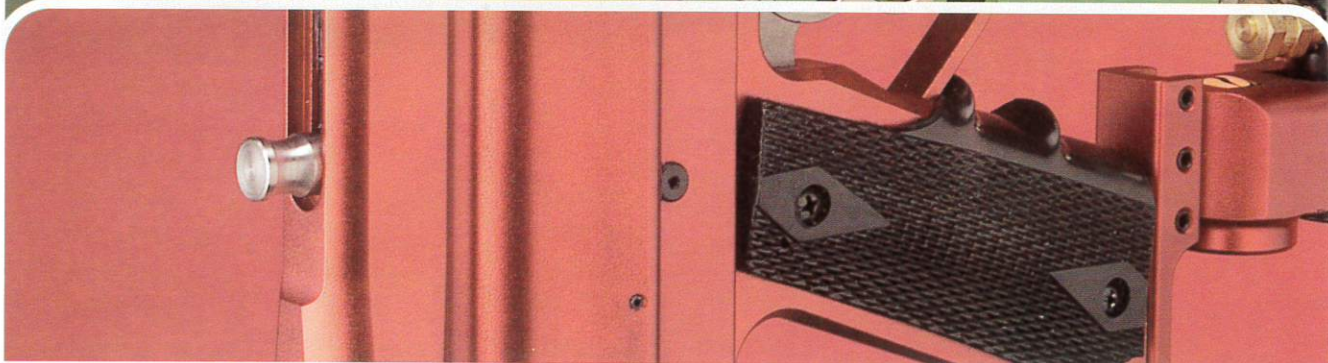

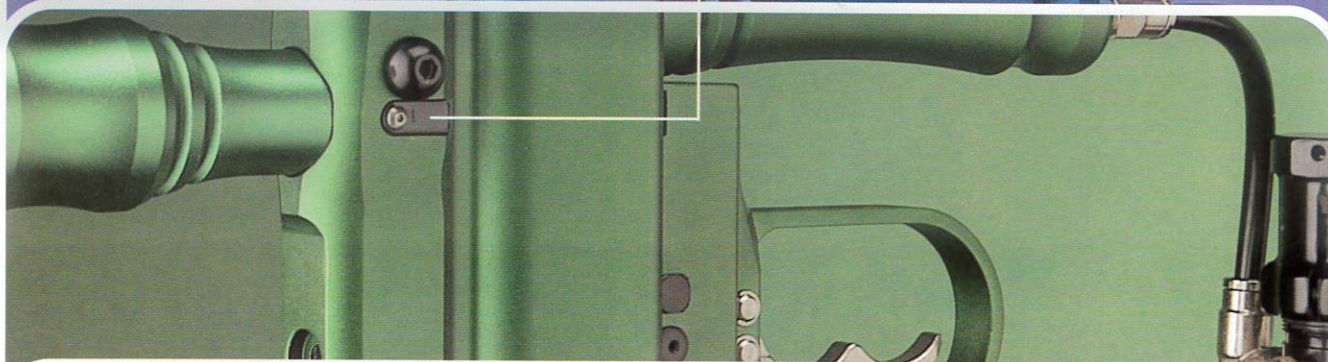

IMPULSE

we invented electronic control with the shocker. then we made it affordable with the impulse. we went a step further, and permitted our dealers to create their own body designs. there are more than a dozen private label designs now available.

VISION

it sees what you can't see. specifically, whether there's a ball properly seated in the breech. if there isn't—it won't fire. which saves you from having to break out your squeegee during a game.

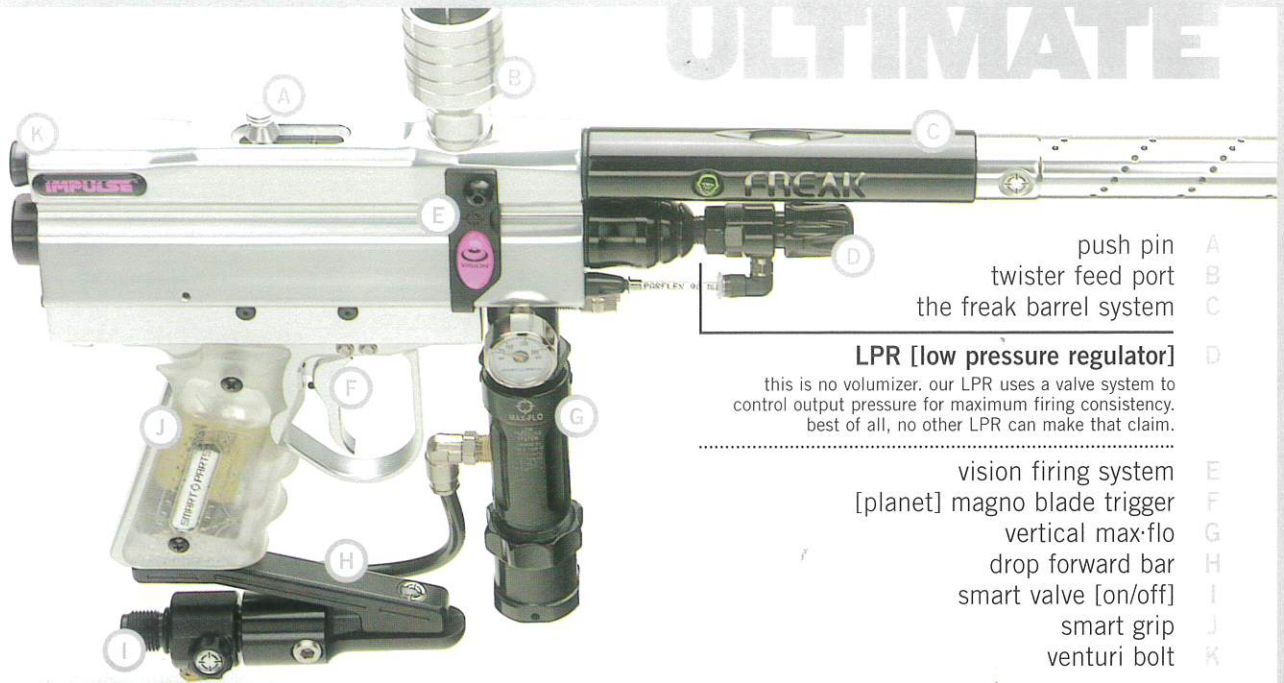

OPTIONS

customizing isn't just for autockers. from major performance upgrades like the freak and vision eye to cosmetic finishes like smart grips and push pins, the options are many. the next three pages show all the possibilities.

STANDARD COLORS ▶ silver, red, green, blue, purple and black [not shown]

ULTIMATE IMPULSE although the impulse is tournament ready out of box, may we suggest a few upgrades?

ULTIMATE

push pin A
twister feed port B
the freak barrel system C

LPR [low pressure regulator]
this is no volumizer. our LPR uses a valve system to control output pressure for maximum firing consistency. best of all, no other LPR can make that claim.

vision firing system E
[planet] magno blade trigger F
vertical max-flow G
drop forward bar H
smart valve [on/off] I
smart grip J
venturi bolt K

TWISTER FEED

unscrew feed cap. insert loader. retighten cap.

CAP & PIN

x-hair logo | titanium freak | cool cap | delrin strange

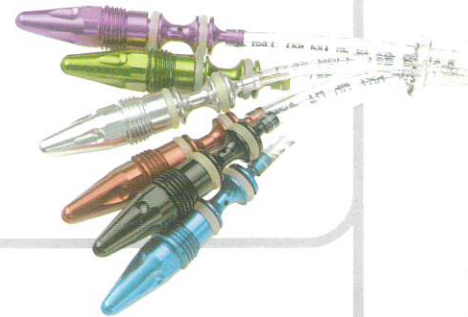

SMART GRIP

soft gel grips fit all 45 frames.

TAPEWORM

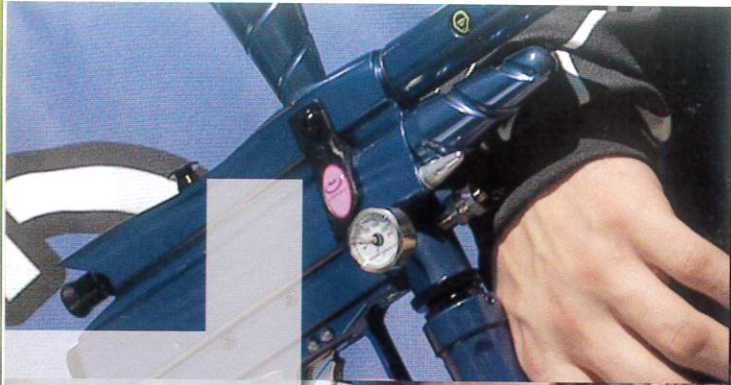

provides constant air flow to solenoid for improved firing performance.

HALO LOADER

engraved with x-hair logo. loads 20+ balls/second. electronic control. reflective sensor technology.

1 PIECE BARREL TEARDROP & PROGRESSIVE

TEARDROP ▶ STANDARD BORE SIZE | 12"+14" LENGTH | FIVE COLORS | FITS MOST GUNS

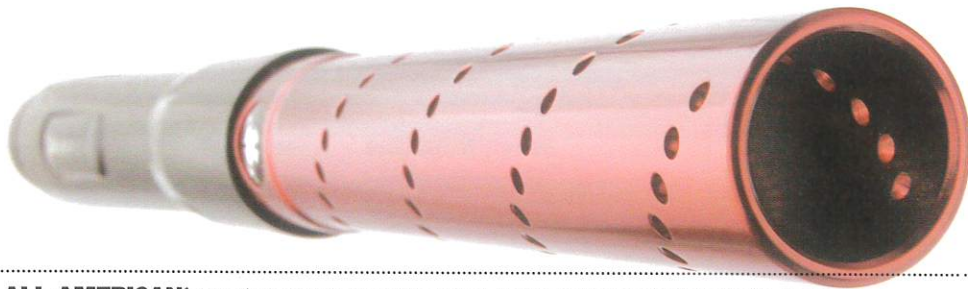

PROGRESSIVE ▶ STANDARD BORE SIZE | 12"+14" LENGTH | FIVE COLORS | FITS MOST GUNS

COLORS ▶ BLACK | BLUE | GREEN | RED | SILVER

TRUE ACCURACY ▶ smart parts first product was a barrel. it was [and is] the most accurate barrel available. whether you're playing with a \$120 gun or a \$1,200 gun, replacing the stock barrel is a good idea. there are four key features that make a barrel accurate. here's what you need to know. **PORTING:** reduces the turbulence around a paintball that causes poor distance and accuracy. we invented porting. here's our patent number: 5,228,427. anyone else who says they invented it is lying. **HONING:** is the finish on the inside of the barrel. smoother is better. and our process—stiff arbor honing—produces the smoothest bore. if there was a better process, we would invent it. **COATING:** we use a ceramic coating called smart tuif which is twice as hard as stainless steel. then we impregnate the coating with teflon to make it slick and durable. teflon greatly reduces friction which causes paint to wobble off target. **BORE:** every paintball is a slightly different size. brands of paint tend to vary. climate and temperature may also change a paintball's shape. having the right bore size is important—unless you like breaking paint. for these reasons, the freak comes in eight different bore sizes—more than any one else.

2 PIECE BARREL ALL-AMERICAN

ALL-AMERICAN two piece design unscrews. choose an all-american or freak front. fits most guns.

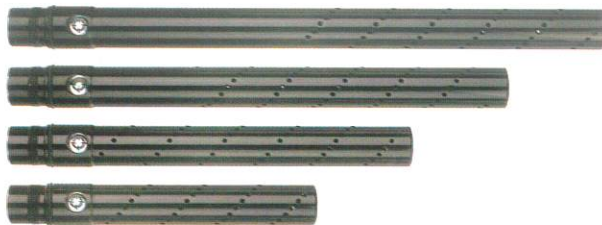

BACK STANDARD BORE SIZE

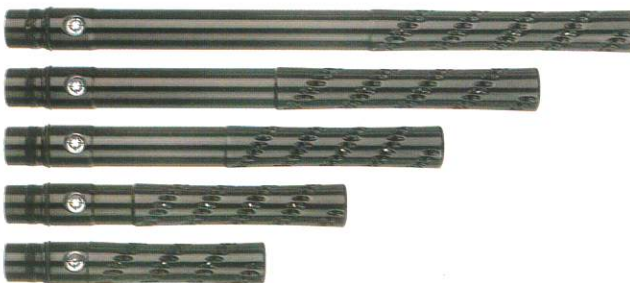

BUILD your own barrel:

1. pick the all-american back that fits your gun.
2. select either the all-american or freak front.
3. choose a front length and color.

SQUEEGEES A-Swab, B-Sniper Cleaner, C-Straight Shot, D-Power, E-Jerk

LANYARD detachable squeegee or keychain

MAX-FLO

GO WITH THE FLO The Max-Flo reigns as the most consistent, most reliable air system you can use—and that's without having to buy a second regulator.

DOMINANCE → the all-americans have been there. team strange is on the doorstep. if winning is what you're about—get the most reliable air system. ours.

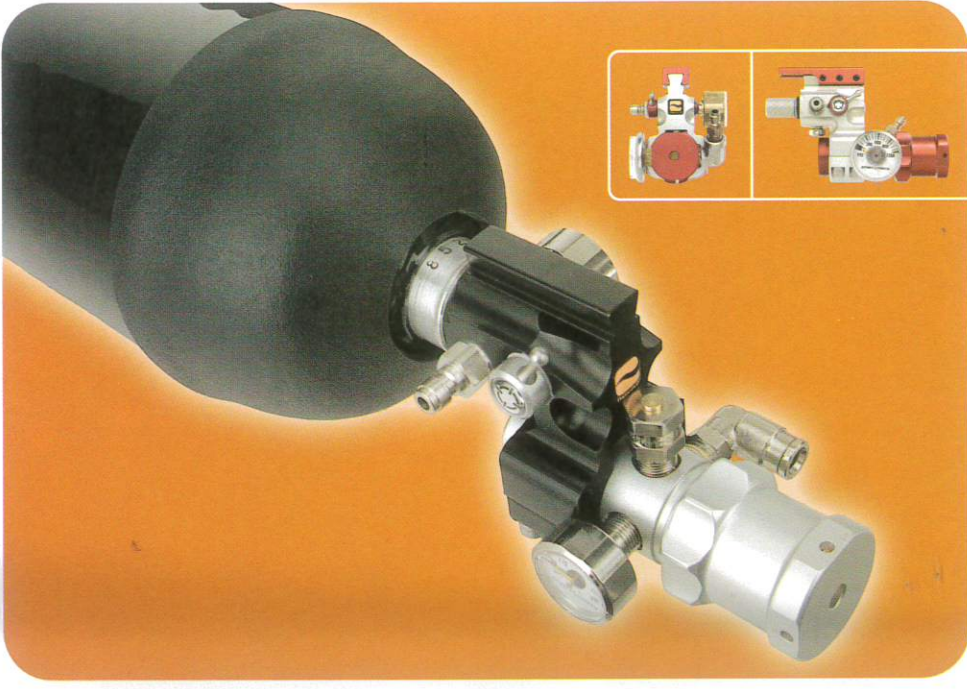

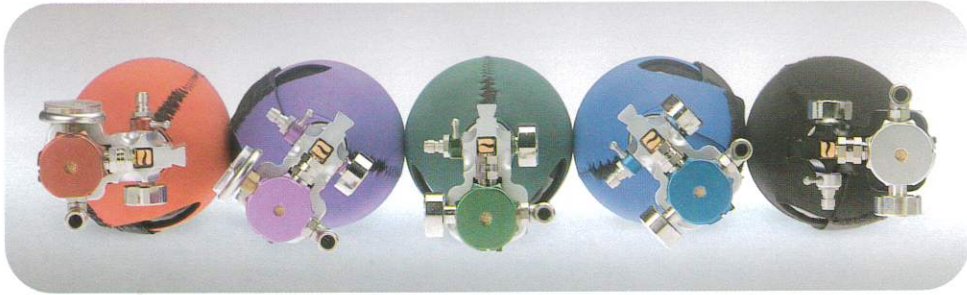

MAX-FLO 3000 using CO₂ or air does not require resetting the regulator.

MAX-FLO 3000 is two systems in one. Fill it with CO₂ or air without resetting your regulator. Includes two spring packs for different output pressure ranges. Available with 68 ci tank.

MAX-FLO 4500 self-adjusting output pressure makes it the best regulator.

MAX-FLO 4500 has one feature no other regulator offers. It's the key to providing consistent, reliable performance and no other air system will ever have it. Why? We have the patent. Two, actually: 5,755,213; 5,957,119. The key feature is **self-adjusting output pressure**. The max-flo is balanced, meaning our regulator automatically adjusts to maintain consistent output pressure—even as the pressure in the tank drops. No other air system offers consistent output pressure without the purchase of an additional regulator. Two regulators to do the job of one? No thanks.

VALVES.TANKS.COVERS.

CUSTOM TEAM JERSEY ▶ rather than wear a jersey with your name & number pressed on with an iron, get a sublimated jersey from smart parts. our jerseys use special inks which when exposed to heat are permanently dyed into the fabric—preventing fading or peeling. you can order one of the custom jerseys shown here and we'll put your name & number on the back, or get with your team and create your own jersey. yeah, we're serious. all you have to do is place a minimum order (10) and we'll turn your artwork into a team jersey. we can also match your jersey to our headbands, tank covers, barrel condoms, skid-knee chigos and packs. sure beats iron-on lettering.
