HOW TO USE THE QR CODES IN THE TIPPMANN CATALOG

X7 PHENOM VIDEO

To view the product videos using the QR codes in this catalog, you first need a QR-code app and a smartphone or tablet equipped with a camera. Simply search for a QR Code reader in the app store and download any one of the popular QR Code Reader apps. They are normally free to download.

When you launch your app of choice, you'll see that your phone's camera is activated, with an on-screen framing guide. Line up the camera on your device with the QR code you want to scan, and hold the device steady until the app can read the code in front of it. You will be directed to a new product landing page with the video shown first. Simply click on the video and watch.

Welcome to Tippmann Sports

Richmond Italia and Denny Tippmann, Jr.,
hands-on every step of the way.

Reflecting back on 2013, Tippmann had a number of exciting new product introductions. For markers, we introduced the Crossover XVR, the Alpha Black Elite, and the Cronus, three markers that fit the needs of almost any type of player. On the accessories side, we introduced the dual pane Intrepid goggle and the very realistic Big Boy grenade. These new products have been very popular. We continue to manufacture the industry's best products right here in Indiana.

Also, I am very proud of our support for the many big games around the world including the Tippmann World Challenge and over 100 other events worldwide. I look forward to continuing to support events in 2014.

The obvious big news in 2013 was the acquisition of Tippmann by G.I. Sportz. Bringing these two companies together will create a one-stop shop for our dealers and fields, the best paintballs, best markers, best goggles, and best service, all from one company. Richmond Italia will be our Chairman and CEO and I will continue as President of Tippmann Sports. The ownership of Tippmann is back into paintball, which is great for our sport and the industry.

Among the major trends you will see in 2014, are an expanded interest in magfed and the resurgence of .50 caliber. We know many players have been hoping that Tippmann will enter the magfed world beyond the TiPX pistol. We saw the opportunity, and created a better magfed marker that will appeal to a much wider audience of players. To make this happen, we are excited to

launch the new magfed Tactical Compact Rifle or simply the TCR, which is featured up front in this catalog. We plan to develop the magfed category to be bigger and more exciting for players and fields.

The .50 caliber growth is something that will fuel the international markets as paintball continues to grow on a worldwide basis. With the GI acquisition of Tippmann, we see synergies that can support the growth of this category that will help fields expand their player base.

There are many other additions in the 2014 catalog including new color options for select markers and accessories, and a new line of Tippmann harnesses and soft goods. Although we are continuing to sell the NXe Elevation line, we felt it was time to expand our Tippmann soft goods line to support our growing woodsball business.

Finally, you will notice a slight change to the layout of our catalog. To emphasize our expanding marker line we have put all markers in the front separated into Magfed markers and pistols, Performance markers, Tactical markers, our U.S. Army line or TPN items for our International markets, and finally our value priced line of Recreational Markers. These items are followed by marker upgrades and mods, general accessories and our popular laser tag business, which continues to grow every year.

Once again, I personally want to thank you for your continued support and look forward to a strong 2014.

A handwritten signature in black ink that reads "Denny Tippmann, Jr." The signature is written in a cursive, flowing style.

DUAL PANE THERMAL LENS

Fogging is caused by temperature differences between the inside and outside of the lens. A Thermal Lens is a Double Pane that acts as insulation between the inside of the goggle and the outside environment.

TRI-LAYER COMFORT FOAM

The thick, durable tri-layer foam is designed to provide the ultimate balance between comfort and functional durability. A firm layer of foam holds the goggle frame, while the second layer conforms to your face, allowing the top layer of soft flocked material to gently caress your skin.

DUAL DUROMETER FRAME

The soft, pliable, lower black frame allows more range of motion for optimal comfort during active play while the rigid GREY top maintains lens stability.

- Spherical Lens
- Quick Release Lens System
- Expanded Coverage Protects Chin, Jaw and Ears
- Additional Ventilation
- Removable Visor
- Non Slip Head Strap
- Fits Replacement Thermal Lens (TA95066)
- Chin Strap Included

INTREPID GOGGLE

T295002 GREY WITH BLACK BOTTOM

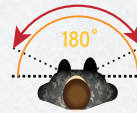

T295009 OLIVE WITH BLACK BOTTOM

VALOR PERFORMANCE GOGGLE

ENHANCED VISIBILITY, COMFORT AND COVERAGE

SPHERICAL LENS WITH ANTI-FOG COATING

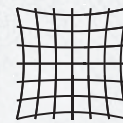

A PERIPHERAL ADVANTAGE

Designed to curve around the face, both horizontally and vertically, a spherical lens offers a greater amount of peripheral vision.

REDUCES GLARE

Glare occurs when the sun's rays hit the goggles at a specific angle, creating a blind area in vision. The curves of a spherical lens make it better equipped to handle glare.

DECREASES DISTORTION

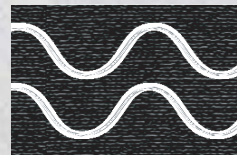

The spherical shape of your eyes allows the eye to better focus, enhancing your vision. In a similar manner, spherical lenses are better at preventing vision distortion while playing paintball.

COMFORTABLE TO WEAR

OPEN-CELL FOAM COMFORT

The soft, breathable open-cell foam instantly conforms to your face and bounces back to its original shape after use, time after time.

NON-SLIP HEAD STRAP

A silicone bead lines the adjustable head strap to keep your goggle in place. Whether you're indoors playing speedball or out in the woods for a scenario game - your goggle won't slip.

VALOR GOGGLE VIDEO

- Additional Ventilation Optimizes Air Flow and Reduces Goggle Fogging
- Expanded Coverage Protects Chin, Jaw, Ears and Forehead
- Single Pane Lens or Dual Pane Replacement Lenses Available
