## THIS IS PLANET ECLIPSE®

This year, as every year, Planet Eclipse has set new industry standards of quality and reliability, we've pushed the boundaries of rate of fire and our customer service and support is proving second to none.

If your aim is to compete at the top level of one of the worlds fastest growing sports, to be one of the elite teams in paintball, to win, then eclipse products are designed for you, you cant afford to choose second best.

Each product from the humble T shirt to the inspirational DC2 has had months of R&D time invested in it. Its not an easy path to take, when you choose this path you have to be determined, many have fallen by the wayside, we have stuck to the plan and its going to bring more changes and new developments to the future of paintball.

EGO

**INSPIRE.CREATE.DESTROY**

> more ego

Planet Eclipse has spent the last 11 years producing some of the most sought after custom parts and custom markers, from Automags, to cockers, Angels, Shockers and Impulses. It was about time to put everything we learned into our own gun. Ego is Planets first completely in-house designed and manufactured gun.

The goal for this product was to produce a marker that bore all the hallmarks of a classic Eclipse. It had to be light, yet robust, stylish and durable. It had to be reliable, yet still deliver outstanding performance. It had to be tournament ready. The kind of gun that you pull out of the box, screw in a tank and go play in the NPPL Sunday Club.

Ego uses the proven system of an open bolt electropneumatic to provide the driving mechanism of its operation. Although the layout and function of most of the parts will be similar to those found in many of this genre of marker, there is not one single component in this gun that is shared with any other non-Eclipse gun. The Frame, trigger and user interface will be instantly recognisable as sharing it's genes with that other recent Eclipse product, the E2. With some of the same shared technology, comes the highly effective TT (Trigger Transition) Debounce filtering system. Combined with low reciprocating mass, minimal shot-kick and the TT filter, any chrono on any circuit can be approached with confidence, not fear. Insane firepower, zero bounce. The best of both worlds.

A great deal of time and effort has been put into making Ego as durable, reliable and as user/tech-friendly as possible. A complete strip of the guns major components can be done in less than a minute. Eyes can be replaced quickly without having to remove the grip frame from the gun, but you can also remove the frame and internals without having to remove the eyes. Simple details like these are easy to design in principle, but much more difficult to put into practice and they make Ego so simple to use. Then there is a stack of other cool features, like the whole hammer, QEV, Exhaust valve/guide, manifold and solenoid can slide out in one go. This gun really is a techs wet dream, yet it has all the performance and style and quality you have all come to expect from an Eclipse marker.

As always, Ego is Manufactured and assembled in UK, by the same craftsmen that brought you the E1, E2, Nexus and Factory Series Cockers. Ego is as flawless a piece of paintball engineering as you will find anywhere on the planet. Machined, finished and anodised in the same facilities that have been producing the Infamously High Tech and visually stunning Nexus Cocker, Ego has the quality and performance that belies it's price tag.

Ego is Pure Eclipse.

The **Eclipse Ego Marker** has to be seen to be believed. *Inspired* by the modern game. *Created* by Eclipse. *Destroy* the opposition.

> inspire.create.destroy

# ECLIPSE® SHAFT BARREL SYSTEMS

Available in both one-piece (**Shaft.Solo**) and two-piece (**Shaft.**) configurations and developed for every aspect of the game, with reverse thread tips that make removing the barrel easy. Whether you prefer the simplicity of a single step bore barrel that's damn straight or the freedom of different bores and multiple lengths, the Shaft Barrel is all you need!

MULTIPLE LENGTHS, MULTIPLE BORES  
**ALL YOU NEED!**

**SHAFT.**

**SHAFT.SOLO**

## **SHAFT. FEATURES**

Two-piece Design  
Light-weight All Aluminium construction  
Patented Barrel Porting Technology  
Unique Reverse Thread for easy Cocker removal  
Micro Honed and Polished Internal Bore  
Available for Cocker, Intimidator, Angel, Spyder, Impulse  
Lengths 14" and 16"  
Bore Sizes 0.686", 0.689" and 0.693" for Cocker  
0.689" and 0.693" for Angel and Impulse  
0.693" Spyder

REVERSE THREAD

ONE PIECE DESIGN AND  
**DAMN STRAIGHT!**

## **SHAFT.SOLO FEATURES**

14" One-piece Design  
Super-light weight due to all Aluminium construction  
Patented Barrel Porting Technology  
Micro Honed and Polished Internal Bore  
Ultra-Quiet  
Available for Cocker, Intimidator, Spyder, Tippmann 98/A5  
Bore Sizes 0.689" for Cocker, 0.693" Spyder, Tippmann  
and all markers using these style threads.

A silhouette of a person wearing a baseball cap and a t-shirt, standing on a dark surface and pulling a rolling suitcase. The background is a dramatic sunset or sunrise with a bright orange and yellow glow and scattered clouds. The person is positioned in the lower center of the frame, facing right.

WHEREVER THE GAME TAKES YOU.

# ECLIPSE® KITBAG

The largest and toughest Planet Eclipse gear bag ever. This **heavy duty**, armoured piece of kit is specifically designed for lugging your performance hardware around the globe. **Whatever your destination**, if your going to start a journey, get equipped with one of these. Holds up to 3 full markers with air systems and all your playing gear, this bag is built tough, styled tight and ready to use, abuse and re-use.

## Product Specifications

Length	85cm
Width	36cm
Height	38cm
Volume	116 Litres

Lock-Down pully handle slides out for those long hauls, slide rails stop the beautiful artwork on the bottom from gettin' mashed up

Rubber reinforced corners and anti drag guards

Heavy-duty construction built to last, won't let you down

2

Pre-formed reinforced lid keeps your kit safe and lookin' good

Complete with padded shoulder strap not featured.

Fully lockable heavy duty zippers

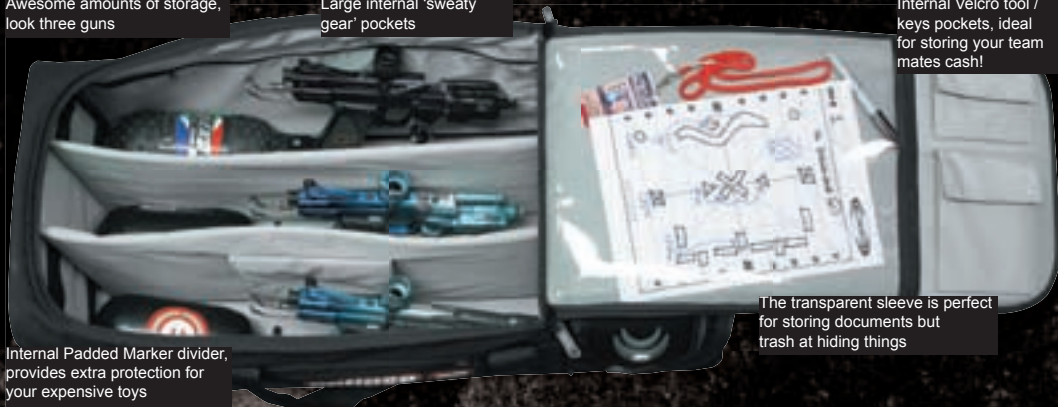

Anti-crush goggle section with preformed reinforced lid and internal mesh pockets

got wheels!

Awesome amounts of storage, look three guns

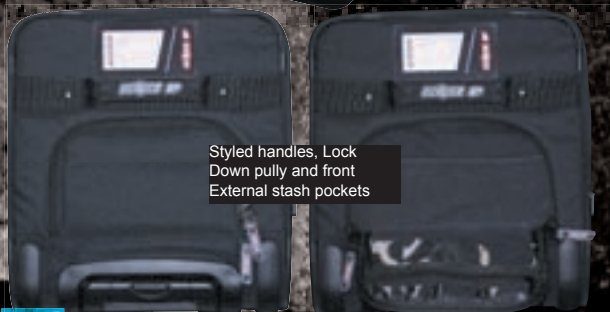

Large internal 'sweaty gear' pockets

Internal Velcro tool / keys pockets, ideal for storing your team mates cash!

Internal Padded Marker divider, provides extra protection for your expensive toys

The transparent sleeve is perfect for storing documents but trash at hiding things

Styled handles, Lock Down pully and front External stash pockets

Above. Barrel or cigar holders your choice

Right. Eclipse® luggage tag in case your precious gear decides to take a walk

> Contact your local Eclipse® dealer

## **ECLIPSE®** **ON / OFF PURGE SYSTEM**

The ultra compact light-weight design of the **Eclipse®** On/Off Purge System makes it a must have addition to any Paintballers setup. Styling some great features:

- > **Low torque on/off**
- > **Easy access lock down**
- > **Down Stream Dump**
- > **Complete with Mini Rail**

**IMPORTANT:** Although the On/Off/Dump Bottom-Line Unit releases air stored in the markers hose and bottom-line, the marker may still have enough air trapped in it to fire a paintball. Once the On/Off/Dump Bottom-Line Unit has been turned off, and pressure has been released from the bleed valve, and the tank removed, always assume the marker is still capable of firing at least one shot. Ensure that any trapped gas is discharged in a safe direction.

## **MINI RAIL**

Low profile mini rail also available seperately  
available in **black / chrome**

**ZERO  
DROP!**

**LIGHT  
WEIGHT**

available in **black / chrome**

# ULTRA COMPACT

available in black / chrome

## **ECLIPSE® LOW PRESSURE REGULATOR**

Now compact and more stylish too, the new Eclipse® LPR will make the perfect addition to any marker which requires Low pressure regulation. Check out the features:

- > Fully strippable
- > Max 100psi output
- > Dual pressure range (15-65psi or 35-100psi)
- > Tournament lockable
- > Ultra Compact
- > Light-weight design
- > High flow
- > Low maintenance

> Contact your local Eclipse® dealer

## **ECLIPSE® NEXUS UPGRADE KIT**

All these Eclipse® parts have been created to work in perfect harmony with the Eclipseblade® or E2 frame, if you want your Cocker to consistently perform at the **high rates of fire** achievable with the Eclipseblade®, WorrBlade or E2 frame then you need to get hooked up with the best internals, there is no point doing half a job.

### **Eclipse® D.A.R.T Bolt**

Angled gas transfer port and bell shaped, open-faced outlet. Full Delrin Construction including Delrin Pin improving gas efficiency and performance.

### **Eclipse® Rex Dialer Kit**

Includes Rex dialler unit, two main springs, Eclipse® hammer, lug and allen key. Eclipse® Hammer has dual nylon inserts for hammer lug and cocking rod. Comes complete with polished fat hammer lug.

### **Eclipse® Supercharger Valve**

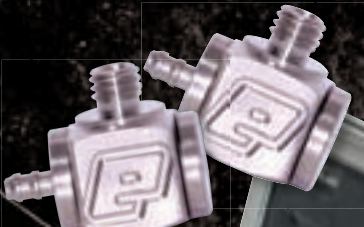

Increases gas efficiency and consistency producing an est. 1650 shots from a 1.1ltr 4500psi tank.

### **Eclipse® Nexus Ram**

Fully strippable and rebuildable no drilling or tapping required for QEV fitting. Micro honed interior bore for smooth performance.

### **Eclipse® Q.E.Vs**

QEV's exhaust used air from your ram allowing your ram to move faster, increasing your cycling speed and potential rate of fire.

**Eclipse® Q.E.Vs**  
available in black / chrome

**All Parts available seperately or as part of the Nexus Upgrade Kit.**

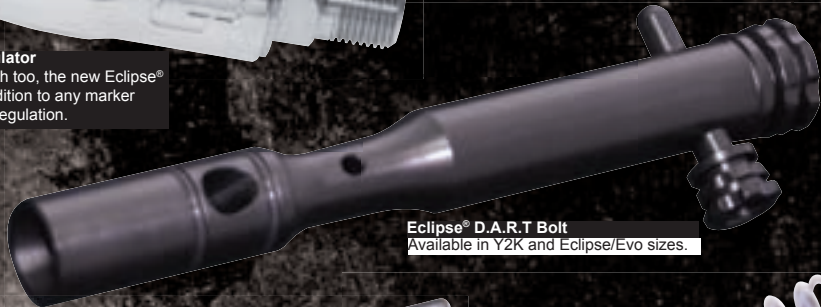

**Eclipse® Rex Dialer Kit**  
Externally adjustable dialer with no need to remove your cocking rod

# UPGRADE YOUR LOCKER!

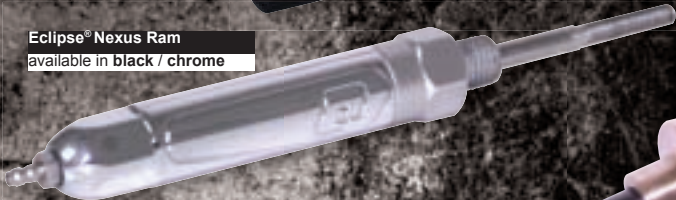

## Eclipse® Low Pressure Regulator

Now compact and more stylish too, the new Eclipse® LPR will make the perfect addition to any marker which requires low pressure regulation.

## Eclipse® D.A.R.T Bolt

Available in Y2K and Eclipse/Evo sizes.

## Eclipse® Nexus Ram

available in black / chrome

## Eclipse® Supercharger Valve

> Contact your local Eclipse® dealer

# ECLIPSEBLADE<sup>®</sup> E2

## FEATURES

### Eclipse<sup>®</sup> Operating System

All new advanced software features and user friendly, graphical split screen displays.

### Training Mode

Allows you to practice your trigger technique by allowing cocking action whilst disabling the sear solenoid and preventing the cocker from firing.

More Finger Space

Low Profile Trigger

Dual Density Grip

Cool Blue LCD Display

COMPLETELY IRRADICATE  
TRIGGER BOUNCE!  
WITH E2s ADVANCED TRIGGER DEBOUNCE ALGORITHM

DOMINATE THE  
GAME

TAKING THE MIGHTY LOCKER TO YET ANOTHER LEVEL

## MORE FEATURES

### Cool Blue LCD

Backlit graphical LCD display. Easy to read even in bright sunlight conditions.

### TT.Filter™

Advanced trigger debounce algorithm can completely irradiate trigger bounce whilst maintaining high rates of fire.

### Thru-Beam Compatibility

Allows you to select between reflective and thru-beam breech sensor configurations \*thru-beam available seperately.

### Eclipse® Samurai 2 Trigger

Low profile and ergonomically optimised for consistent high rates of fire.

### Integrated Minifold ( available seperately )

Captivated gasket and press-fit barbs reduce leaks produce improved airflow, increased performance and greater cycling speeds.

### Dual Density Grip ( available seperately )

Constructed of both rigid plastic and soft rubber for style and comfort also fits E1 frames.

### Improved Trigger Return

Stronger magnet provides increased trigger return force for greater range of adjustment.

### Increased Battery Life

Massive reductions in both stand-by and operational power requirements mean thousands more shots per 9v battery.

**Easy Access Buttons**

**Backlit LCD Display**

Easy to navigate menus allow you to customize your setup to suit your style

**Dual Density Grip**

Constructed of both rigid plastic and soft rubber for style and comfort

**Fully Enclosed Solenoid Housing**  
Protects the solenoid keeps it free from dirt

**Hi-Flow Integrated Manifold**  
Captivated gasket and press-fit barbs

# ECLIPSE® SPARES & REPAIRS

Whether you are purchasing your first piece of paintball equipment or the latest DC2 Nexus Cocker, you will receive **award winning support**, advice and servicing from our technical and sales staff. We pride ourselves on our reputation within the industry for unsurpassed levels of customer support and service, something that we are unwilling to sacrifice - ever.

Out of working hours problems? Simply check out our **Interactive Knowledgebase** in the Support section of [planetecclipse.tv](http://planetecclipse.tv).

A full range of marker servicing and product installation is also available at all **Eclipse Service Centres** worldwide. Check online at [planetecclipse.tv](http://planetecclipse.tv) for a full list of Service Centres and services offered at each location.

# START A JOURNEY

We have all started a journey. Some of us choose recreation and some choose competition. The journey we have all chosen stops at many different places, but travels in the same direction. It travels through many different **locations** and **countries** within many different **cultures** and influences. Paintball is constantly **gathering momentum**, developing at a phenomenal rate that is in-turn influencing wider audiences, getting younger, faster and hungry for the sweet taste of **winning**.

At Planet we **change, bend** and **break** the boundaries pushing them beyond convention, raising the bar for everyone to follow. From the **award winning** staff at Planet Eclipse to the tournament winning Eclipse teams from around the globe, we all **demand the very best** performance from Eclipse products, we are all driven by this accelerated race to win the game. This drive to win is our **creative inspiration**, this is why we build Eclipse products, the reason Planet Eclipse exists.

The journey has a beginning for all of us, **how far will you go?**

we **change, bend** and **break**  
the boundaries.

IT'S MORE ABOUT THE PEOPLE YOU MEET  
AND THE PERSON YOU WILL BECOME

YOU ARE GOING TO TRAVEL THE GLOBE  
AS A TEAM OF PLAYERS. EVERY NEW  
TOURNAMENT BRINGS A NEW CROWD A  
NEW LEVEL OF COMPETITION.

OVER THE YEARS YOU REALISE THAT A WHOLE NEW SPORT HAS EVOLVED AND A NEW GENERATION HAS STEPPED INTO THE LIGHT

ALL★STARS  

WE ALL DEMAND THE VERY BEST  
PERFORMANCE FROM ELLIPSE PRODUCTS
