**Sterling Bronze**

**Paintball Consumer Reports International - March 1992 reported:-**  
"It's consistency, it's accuracy, it's velocity, it's rate and ease of fire - the Sterling is unsurpassed excellence".  
"Their quality control programme must be superb".

**Sterling Silver**

**Paintcheck - March 1992. Ken Kelsch**  
"The impressive finish was the first thing to register. The gun was remarkably accurate, and had a very quiet noise signature, with the slickest action yet on any pump directly out of the box. It's ultra-fast short stroke fed round after round with no problems, no pinching."
