SAFETY EQUIPMENT and CAMO

PALMER'S PUMPERS "FROM MILD TO WILD"

EACH PALMER GUN IS PRECISION CRAFTED TO EXACTING STANDARDS THEN INDIVIDUALLY TUNED AND TESTED TO INSURE OPTIMUM PERFORMANCE.

PALMER BASIC

12 gm w/dir. feed
\$185.00

BASIC :
Direct Feed
with Loader
11" brass barrel
QuikStrip syst.

"PALADIN"

"QuikSilver" - 12 gm
\$265.00

"HOUNDSTOOTH"

CA ready Rear or Ventr. GSR
\$325.00

CONTOUR PUMP AVAIL.

Included with PALADIN & HOUNDSTOOTH
Performance Tuned - Direct Feed & Loader
QuikStrip system - AutoTrigger - InstaPierce
TruDial Velocity Adjustment (set WHILE shooting)
Ball Feed alignment control - Custom Barrel

Available in **STOCK CLASS** format

"PAINTER" optional sniper stock shown

"QuikSilver" quick change or
CA system adapter
Direct Feed with loader
Performance Tuning
Ball feed control - InstaPierce

Some CUSTOMIZING Ideas

Nickel Plating
Grips and Forends
Spiral Vented Barrels or Muzzle Breaks
Stocks - Sights
Remote CA Setups
Dual Bottle system
Feed systems and Loaders

ALL OF THESE GUNS CAN BE SET UP TO FIT YOUR NEEDS - CALL FOR PRICING

STORM ON

ADVANCED PNEUMATIC AUTOMATION (Smooth Dependable Operation)

Typhoon - Vertical Bottle
Basic \$480.00

Typhoon - Back Bottle
Basic \$508.00
Dual Bottle - \$560.00

Typhoon Calif. or
Lower Bottle Style
Basic \$550.00

Hurricane
Basic \$669.00

DBL Hurricane
Basic \$795.00

Nasty Typhoon
Basic \$695.00

EACH PALMER SEMI IS PRECISION CRAFTED TO EXACTING STANDARDS then INDIVIDUALLY TUNED & TESTED TO INSURE OPTIMUM PERFORMANCE

ADVANCED PNEUMATIC AUTOMATION

- Short Trigger Pull that is Light and Crisp - Traditional Ruggedness
- Ultra Smooth Brass Barrel, Precision Honed & Polished for Unmatched Accuracy
- High Gas Efficiency with Max Performance Valving (up to 80 shots per our
- ULTRA QuikStrip (fast field stripping)
- TruDial Velocity Adjustment
- Consistent Velocity At Any Rate Of Fire
- Nickel Plated
- Ball Feed Control Detent
- Spiral Vented Barrels ... add \$30.00 per Bbl.
- Dual Bottle CA System ... Call for Price

FULLY EQUIPPED

Includes:

- CA Bottle (3.5, 7 or 10 oz.)
- Bulk Loader (several types avail.)
- Muzzle Break
- Muzzle Plug
- Canvas Tote Bag

Single Barrels add \$75.00

Double Barrels add \$105.00

SEMI-AUTO CONVERSIONS AVAILABLE FOR MOST SHERIDAN BASED EQUIP.

Other custom services available to bring your existing equipment up to competitive standards or to personalize your equipment. For other Custom services, contact our competent Service Staff for pricing and time schedule. Use your imagination to get the best performance and handling characteristics from your existing equipment without the higher costs and inconvenience of a new paintgun. When you need all that you can get from your equipment, Palmer's has the Experience, the Equipment, the Materials and the Desire to help you get what you need!! PLUS, we will Save You Money by upgrading!!

Specialties for Auto Cockers

From the DEVELOPER of the Automated
Cocking System for Paintguns

Performance Tuning (includes valve and barrel work)	Trigger
Job with external hammer release adjustment and Timing Setup	\$65.00*
Trigger Job only; to shorten and soften trigger pull	includes
ext. hammer release adj	\$40.00*
Ultra Mini-Cocker Conversion-All of the above Plus; shorten and lighten main body, Ball Feed Detent, Threaded stainless trigger rod and coupler,	
LITE ROCK regulator and more.	
set up for Bottom line or remote	\$175.00*

The above are just a few samples of what we can do for your Auto-Cocker to set it up to be exactly what you want in your Paintgun. If you don't see the setup or services you would like, no problem, just tell us how you want it and we will put it together for YOU. Use your imagination! At Palmer's Pursuit Shop, CUSTOM still means something! We made Semi's a reality in this sport and we are still making them better and easier.

AUTO COCKER UPGRADE COMPONENTS

LITE "ROCK" regulator - black anodized, light-weight aluminum (SystemGuard pressure relief) includes LIFETIME WARRANTY	\$52.00
With Installation	\$60.00*
Adjusting Knob (not really needed)	\$2.00
Clippard cylinder (cocking ram)	\$26.00
with Installation	\$36.00*
4-Way valve - (replacement for stock 3-way valve) detail polished internals, improved seals shorter, more positive operation	\$22.00
with Installation	\$38.00*
Ball Feed Detent (requires drill&tapping)	\$9.50
with Installation	\$19.50*
Air Line - black polyurethane - stronger and more flexible.	per ft. \$1.50
Trigger Rod and Threaded coupler	\$9.50
Soft Spring Kit for Nelson type Springing	\$35.00
with Hammer	\$58.00
COC-KEY - adjust velocity without removing the cocking rod	\$15.00

Airgun Lubricant - Specially formulated for pneumatic systems - 1oz. bottle - (supplied with all PALMER built paintguns) \$2.00

**DUN-RITE
SYSTEMS**

MORE PARTS, PIECES and IDEAS

THE "ROCK" regulator

Upgrade your AutoCocker to an Auto"ROCK"er with the steady as a "ROCK" regulator. By far, the most widely used automation system regulator in the game. The "ROCK" ELIMINATES - Ruptured Air Lines, Damaged Cylinders and Valves, Locking-up from liquid, Continual Adjustments and Erratic Operation. This is a "set-it and forget-it" unit.

WHY? The "ROCK" has 5 times more regulated storage and nearly 10 times LESS variation, due to supply pressure changes, than the stock regulator. The "ROCK" allows lower operating pressure and provides smoother and much more consistent operation while protecting the rest of the system with a "System Guard", Over Pressure Relief System, for safety. With LIFETIME Warranty !!!

"LITE ROCK", Black Anodized Aluminum \$52.00
 Adjusting Knob (for you non-believers) . . . \$2.00
 Cust. Colors (red, blue, silver, gold) . . . add \$5.00
 Bright Nickle Plate (looks like Chrome) add \$15.00

The "STABILIZER"

All of the features of the "ROCK" but designed for the higher pressure output needed to regulate and stabilize paintgun velocities. Particularly well suited for use as the first stage of a two-stage regulation system for the AutoMag, providing approx. 25 times greater consistency in pressure allowed into the gun.

Eliminates the need for bulky expansion chambers because the regulation just won't let liquid through; virtually eliminating any chance of a hot gun penalty. Can also be used to STABILIZE the supply pressure for any paintgun setup for CO2, Nitrogen or High Pressure Air!!!

The proven performance of PALMER'S REGULATORS makes the "STABILIZER" a must for all pressure controlled firing systems.

Available in three formats: IN-LINE with 1/8" NPT pipe fittings in and out. - with Male bottle valve type threads in and 1/8" NPT out . - with Female bottle valve receiver in and 1/8" NPT out.

STABILIZER - IN-LINE \$65.00
 STABILIZER - male or female
 (valve type threads in) . . . \$75.00

Cust. Colors (red, blue, silver, gold) . . . add \$5.00
 Mounting Bracket for Stabilizer(bottom line) \$19.00

SEMI-AUTO CONVERSION RATES

All Conversion rates are based on application to FACTORY STOCK condition equipment. Call for rates to convert previously modified equipment.

All conversions include (at least): Ultra QuikStrip - Velocity Adjuster - Ball Feed Detent - Nickel Plating - Hex Wrenches - Lube Oil - Palmer's Patch and an easy to read and understand Manual that we are sure you will find as interesting reading.

TO STROKER FROM	VERTICAL BOTTLE	BACK BOTTLE	DUAL BOTTLE
P68-SC LIFE ADJUSTOR	\$305.00	\$330.00	\$440.00
PMI-1-DI or P-12	\$275.00	\$300.00	\$410.00
PIRANHA- LB or P68- AT	\$290.00	\$260.00	\$370.00
PIRANHA- SB PMI-2 68 Magnum	\$320.00	\$290.00	HURRICANE RIFLE
KP-2 or KP-3	\$350.00	\$375.00	\$300.00

SEMI-AUTO CONVERSIONS from PALMER'S PURSUIT SHOP

Six years of proven performance has shown the Palmer developed system to be the PRICE/PERFORMANCE leader in the industry. These conversions are available for all of the Sheridan/PMI pump action paintguns. (except PGP)

Let Palmer's Pursuit Shop bring that dusty old pumper into the 1990's with the STROKER conversion. Even the Sheridan/PMI K-series (wooden stock) rifles can have a new life. The transformation of these old favorites will render a serious performer that is real close legendary Hurricane and/or Typhoon with the high-end reliable performance demanded by the Pro's.

Advanced Pneumatic Automation provides quick, smooth cycling with closed bolt firing, achieving unmatched on-field effectiveness without compromise to accuracy or firepower. This automation system is meticulously hand crafted into each paintgun; then each and every paintgun is individually tested and tuned to exacting standards so as to ensure optimum performance and STAYING-POWER.

Four different styles are available: Back Bottle (like std. Piranha) - California Style (bottle mounted under stock) - Lower Bottle (bottom line style) - Vertical Bottle (our most popular version with the bottle setting vertical in front of the trigger guard) Other features included in this metamorphosis are: Maximum performance Valving (improves efficiency and consistency) - the UltraQuik field strip system for cleaning - Ball Feed indexing (no double feeding - custom Molded Grips and a super tough, matte Nickel Plated finish for enduring good looks !!

Reliable? YES! Ask anyone that uses one. Tournament teams have regularly reported that they have been able to hammer through tournament after tournament without a single equipment failure or need of repair of any kind. This is reliable performance! It is nice to know that your equipment will be there for you when you need it the most and it is backed up by a full 1 year guarantee. So, if you have a Sheridan/PMI pump paintgun and just can't keep up with the semi-autos, there is no need to buy a new paintgun!!! Let Palmer's Pursuit Shop bring yours up to speed !!
